

Education Customer Story

Mastering G Suite/Chromebook printing for over 6,000 students

Need

Dallastown Area School District (DASD) wanted to introduce a fleet of affordable Chromebooks, which meant sysadmin John Lenhart had to pick a new print management solution that could:

- provide easy G Suite/Chromebook printing for over 6,000 students
- overcome the limitations of untraceable printing; and
- reduce the high support overheads of student and staff printing

“A big issue was that students could see every printer and send jobs anonymously all over the district... With PaperCut MF, we can finally see what our true student printing looks like.”

– John Lenhart, DASD Sysadmin

Customer profile

Dallastown Area School District

Country USA

Staff Approx. 850 (500 teachers and 350 support staff)

Students Approx. 6,200

Website www.dallastown.net

Dallastown Area School District is suburban public school district located in Dallastown, Pennsylvania. Comprised of six schools across 52.5 picturesque square miles, it provides a safe, challenging, and relevant learning environment to inspire and create pathways for success.

Solution

John chose PaperCut MF and its built-in BYOD printing feature Mobility Print for four big reasons:

1. It lets students print from any iOS, Android, Chrome OS, Windows, or MacOS device.
2. It installs in just a few clicks, and any added printers show up automatically.
3. It uses the device's interface, so students can jump in without learning new platforms.
4. It authenticates/tracks jobs without joining a domain – staff and students simply connect to the network and choose a printer.

DASD have also been enjoying plenty of other PaperCut-powered benefits, including:

- Comprehensive tracking for schools, departments, and users
- Find-me print queues to send jobs to the right printer; and
- Detailed reporting to gain cost-cutting insights

Outcome

PaperCut MF and Mobility Print have given DASD a powerful and easy-to-use Chromebook printing solution, making John's day-to-day easier, and DASD's printing more efficient – all the while reducing paper waste and IT/infrastructure overheads.

"I can push a policy out in G Suite and know everyone will get it. It's the same with PaperCut MF. In 10 minutes, every Chromebook had it – I didn't have a Chromebook printing issue all year."

– John Lenhart, DASD Sysadmin

"If you have Chromebooks in your school, use PaperCut MF for an easier way of doing things if nothing else."

– John Lenhart, DASD Sysadmin
